

Self-Transformation to Avoid Elimination by The Times

New Industrial Ecosystem Unveiled: Grand Opening of Guangdong ADVANTEC Industrial Products Supermarket

On June 23, 2026 in Foshan, Guangdong, beneath the bright summer sun and amid surging waves of the Pearl River, southern Guangdong brims with auspicious energy. This landmark date will forever be etched into the development history of ADVANTEC. After months of meticulous planning and refined preparation, the industrial products supermarket operated by

Guangdong ADVANTEC Industrial Products Co., Ltd. grandly opened its doors today. It debuted with a refreshed brand identity, forward-thinking strategic vision and fully immersive purchasing experience. More than just a much-anticipated opening ceremony, this event stands as a powerful statement of ADVANTEC's commitment to expanding its footprint across South China and empowering the

manufacturing sector's industrial upgrade.

Gathering strength to forge new momentum, we set sail riding on the wave! Between 9 a.m. and 10 a.m. on this clear, auspicious day, the company hosted a grand ribbon-cutting and plaque-unveiling ceremony. Distinguished guests from all walks of life gathered in full attendance to witness this inspiring milestone together.

Speeches by Distinguished Guests

The ceremony opened with a speech delivered by Lin Gaoquan, Deputy General Manager of Zhejiang ADVANTEC Network Technology Co., Ltd. He reflected sincerely on the months of preparation that turned the original blueprint into reality. "Today marks the first step toward fulfilling our long-cherished dream: building a full industrial supply chain service platform underpinned by an all-new industrial ecosystem model.

Back in 2009, I recognized that focusing solely on a single product line could not sustain long-term growth, and full-category supermarkets would become the mainstream trend of the industry. In 2017, I reached a consensus with Chairwoman Wu of Sanlux and we began exploring this business model. Now, we are determined to drive self-transformation to help distributors and secondary dealers upgrade their business and brace for market shifts over the next five to ten years.

Rather than waiting passively for change to

High Expectations Shared for a New Journey

come, we choose to take the initiative to reinvent ourselves. We aim to partner with more stakeholders to build a chain supermarket network and grow stronger amid industry disruptions. Thank you for every blessing; let us accelerate toward our dreams!"

Wu Qiongying, Chairwoman of Sanlux Co., Ltd., delivered a forward-looking keynote address. "Our large hardware markets once consolidated scattered small stores, completing the first round of integration. Yet the second transformation has proven far more challenging than we anticipated. During a visit to Toyota's facilities in 2015, I witnessed the seamless collaboration across production lines. It dawned on me that we were not incapable of such efficiency—we were simply held back by our past successes. Heavy asset holdings carry particular risks—once real estate becomes an investment vehicle, it turns into a burden. I only own one residential property; I sell my old house whenever I move to a new one, as only with a lean asset base can

we pivot flexibly.

I have traveled across Europe and the United States, where large-scale industrial products supermarkets are fully mature. Yet when I visited Southeast Asia, local customers told me 'no such enterprise exists in China.' Why is that? It is not a lack of technical capability. For the past three decades, profits came too easily, leaving little incentive to transform. Today, the internet has eliminated information asymmetry, and artificial intelligence has put every market player on an equal footing. Those who embrace transformation first will seize hold of the future.

Therefore, I make this appeal to all peers across the country: Let us unite! We refuse to be phased out by the times. Instead, we will lead proactive reform and reshape the industrial chain through the chain supermarket model. Today is merely our starting point. May we stand side by side and stay ahead of the curve in this era!"

Celebration Ceremony

Splendor, Joy, Enthusiasm

At 09:28 a.m., the auspicious hour arrived amid brilliant morning sunlight. The distinguished ribbon-cutting guests lined up side by side, each holding golden scissors tied with red silk flowers. Present were Wu Qiongying, Chairwoman of Sanlux Co., Ltd. (3rd from left); Guo Lijun, Executive Deputy General Manager of Sanlux Co., Ltd. (2nd from left); Lin Gaoquan, Deputy General Manager of Zhejiang ADVANTEC Network Technology Co., Ltd. (1st from right); Xin Zhenxiang, Dean of the School of Polymer Science and Engineering, Qingdao University of Science and Technology (2nd from right); and Xi Linpeng, General Manager of Guangdong Kebo Industrial Goods Co., Ltd. As the host counted down "Three, Two, One" across the venue, all guests cut the silk ribbons in unison. The red silk split instantly, accompanied by soaring celebration fireworks and thunderous waves of applause and cheers. This symbolic moment heralds a prosperous future for Guangdong ADVANTEC Industrial Products Supermarket, promising steady growth, boundless opportunities and smooth progress ahead.

Upon completion of the ribbon-cutting, all honored guests jointly held the red silk veil and slowly unveiled the official plaque of Guangdong ADVANTEC Industrial Products Supermarket.

The words "ADVANTEC" shimmered brilliantly under the bright sun, marking the official launch of this modern industrial products supermarket.

The ceremony then moved on to the highly solemn and auspicious Southern Lion Eye-Dotting ritual, a core tradition of Lingnan celebrations brimming with profound blessings. Four lifelike, majestic Southern lions bounded into the central venue to the powerful, rhythmic beat of drums, striding boldly and nimbly leaping about. Their performance symbolizes year-round prosperity and well-wishes from all quarters, filling the grand opening with abundant auspicious energy and vitality. Wu Qiongying, Chairwoman of Sanlux Co., Ltd., Guo Lijun, Executive Vice General Manager of Sanlux Co., Ltd., Lin Gaoquan, Deputy General Manager of Zhejiang ADVANTEC Network Technology Co., Ltd., and Xi Linpeng, General Manager of Guangdong Kebo Industrial Goods Co.,

Ltd., each took a vermilion calligraphy brush and stepped forward solemnly and reverently to dot the eyes of the four lions in sequence.

Dotting the left eye, glowing golden: Wishes flourishing business and abundant wealth reaching every corner of the globe; Dotting the right eye, shimmering silver: Wishes endless streams of customers and smooth operations across all regions; Dotting the lion's forehead, blessed by lucky stars: Wishes ADVANTEC to seize grand opportunities and build an enduring enterprise for generations; Dotting the lion's mouth, resonating far and wide: Wishes widespread praise and an outstanding reputation known throughout the industry. Once the eye-dotting ritual finished, the four lions seemed infused with new life and spirit, their eyes shining vividly. They then lifted their heads proudly and spat out four auspicious scrolls inscribed with "Prosperous Era & Rapid Growth", "Grand Opening & Great Fortune", "Abundant Revenue Every Day", and "Ambitious Blueprint". The stunning spectacle pushed the festive atmosphere of the opening ceremony to its magnificent climax.

Store Visit

Scenographic Display, Immersive Experience

Stepping into Guangdong ADVANTEC Industrial Products Supermarket, visitors are instantly greeted by sleek, contemporary industrial aesthetics that deliver a refreshing, relaxing atmosphere. A stark contrast to cramped, cluttered traditional hardware stores, the venue features an open layout with low display racks and soft, warm lighting that creates a heightened sense of spaciousness. The entire sales floor feels bright, airy and neatly organized.

In terms of product display, the supermarket has ingeniously created a panoramic scenario-based display area. Industrial mechanical and electrical equipment, fasteners, manual and power tools, electrical materials and lighting, and labor protection and safety auxiliary materials are organized in an orderly manner, making the originally complex and

professional selection and procurement process clear at a glance and within easy reach. As customers stroll through the space, what they see is what they get, and what they select is ready for immediate use, truly fulfilling the promise of "making industrial product procurement as easy and pleasant as shopping at a supermarket." On the brand joint display wall, the official authorization credentials of major strategic partner suppliers are neatly aligned and presented collectively. This transparent showcase builds uncompromising quality assurance, allowing every customer to purchase with complete confidence in product reliability.

Guided by the staff along a meticulously planned visiting route, the guests visited various themed exhibition areas one by one, including the Fastener

Zone, Power Tools Zone, and Labor Protection Experience Zone, deeply experiencing the standardized operational management and digital-intelligent core of the supermarket. At the conclusion of the visit, the accompanying guests unanimously expressed that the stunning completion of the Guangdong ADVANTEC Industrial Products Supermarket has not only significantly elevated the image benchmark and service standards of regional industrial product retail terminals, but also accurately met the urgent demands of the current manufacturing industry for flexible supply and agile response through its innovative business model of deep online-offline integration. They noted that the prospects for future cooperation are broad and highly anticipated.

Future Outlook

Braving the Waves Together to Write a New Chapter

Drawing collective strength and riding the surging momentum of industrial advancement, the grand opening of Guangdong ADVANTEC Industrial Products Supermarket marks another pivotal milestone in ADVANTEC's national strategic layout, following the successful operation of its flagship store in Keqiao. It signals that ADVANTEC's offline service network has entered a golden phase of accelerated expansion.

Building on this new starting point, Zhejiang ADVANTEC Network Technology Co., Ltd. will

leverage the robust industrial foundation of Sanlux Co., Ltd. and its own cutting-edge digital platform strengths. Working closely with all upstream and downstream partners, the company will take digital technology as its driving force and genuine, high-quality products as its core footing. Rooted firmly in Foshan's thriving manufacturing hub, ADVANTEC will extend its reach across the entire South China economic circle. Looking ahead, ADVANTEC will stay focused on its core industrial products service

business. The brand will continuously optimize its product portfolio and upgrade its service system, unswervingly leading industrial product procurement into a simpler, more transparent and more efficient era. On this vibrant manufacturing ground, the ADVANTEC employees will forge ahead bravely amid market shifts. With thoughtful, considerate customer service, we will stand side by side with countless customers to co-create brilliant new achievements in industrial product supply chain services.

Focus on Low-carbon & Cutting-edge Industry Research

Postdoctoral Research Proposal Presentation of
Dr. Hou Zhanfeng Successfully Held

On the morning of June 5, Sanlux Co., Ltd. successfully held the postdoctoral research proposal presentation meeting for Dr. Hou Zhanfeng. This presentation meeting invited Ms. Wu Qiongying, a well-known industry expert, professor, and corporate workstation mentor, to jointly form the opening review expert group. Also attending the presentation meeting were leaders from the Keqiao District Human Resources and Social Security Bureau and heads of relevant company departments. After rigorous discussion and comprehensive evaluation by the expert group, Dr. Hou Zhanfeng's project successfully passed the opening defense.

Since its establishment in 2016, the Postdoctoral Workstation of Sanlux Co., Ltd. has been consistently committed to promoting the deep integration of industry, academia, and research, as well as the cultivation of high-level talents. Dr. Hou Zhanfeng, as an outstanding new postdoctoral researcher at the workstation, is a core scientific research talent jointly cultivated by the workstation and the postdoctoral research station of Qingdao University of Science and Technology. He possesses a solid foundation in rubber formula research and development. Previously, he served as the head of formula technology at the research institute of Sanlux, leading the company's research, development, and implementation of rubber formulas. Dr. Hou is familiar with our company's production processes, product pain points, and industry technical shortcomings, and possesses extensive experience in R&D and industrialization. His research topic, "Research on the Design, Preparation, and Performance Regulation Mechanism of Heat-Resistant Transmission V-Belts under a Green and Low-Carbon Material System," closely aligns with the national "dual carbon" strategy and industry trends in green manufacturing and waste rubber recycling. The technical direction is cutting-edge and the application value is prominent, which is of great significance for the company to break through key technologies for low-carbon transmission belts and create differentiated high-end products.

The evaluation committee listened to Dr. Hou Zhanfeng's opening report and conducted on-site questioning. After inquiry and discussion, the assessment team unanimously agreed that the project has filled the technical gap in specialized rubber formulas for transmission V-belts with high bio-based carbon content by designing and developing a full series of bio-based rubber formulas for transmission V-belts and completing the integrated compounding of bio-based matrix rubber, low-carbon reinforcing fillers, recycled materials, and low-carbon additives. This effectively addresses industry pain points such as the high proportion of petroleum-based materials, high carbon emissions, and poor environmental compliance in transmission V-belts. The research ideas of the project are clear, the technical route is feasible, and the research content is substantial. The key challenges and innovations are well-defined, the work plan is reasonable, and the expected results hold high theoretical value and prospects for industrial application. The project closely aligns with the green and low-carbon development needs of the rubber industry. The research plan is scientific and feasible. Approval is granted to commence the project.

Indonesia Market Deepening: A Milestone Step in Globalization
Sanlux Product Launch Successfully Held

From June 8 to 11, 2026, Sanlux successfully held a brand product launch and promotion conference in Surabaya, Indonesia. The event attracted over 120 local dealers and industry customers, marking a significant milestone in Sanlux's efforts to deepen its international strategic deployment and comprehensively expand into the Southeast Asian market.

The conference opened with a speech delivered by the General Manager of Asian Bearindo Group, the strategic partner of Sanlux in Indonesia. The General Manager, representing local Indonesian channels, extended a warm welcome to the Sanlux team and spoke highly of the strategic cooperation prospects between Sanlux and Asian Bearindo Group. The opening remarks set a pragmatic and positive tone of cooperation for the entire event.

Subsequently, representatives from the Sanlux Asia-Pacific team gave a systematic introduction of Sanlux. The team highlighted Sanlux's five core product lines and its comprehensive product classification system, which fully covers application scenarios such as industrial machinery, agricultural equipment, and automotive transmission, aiming to provide one-stop power transmission solutions for the Indonesian market. Additionally, the team highlighted the Sanlux Core Strategic Test Centre, which is equipped with advanced dynamic and static testing capabilities to accurately simulate real-world operating load conditions. All products undergo full-process verification in strict accordance with international standards, truly putting into practice the philosophy that "innovation is always verified, never assumed."

At the climax of the conference, Mr. He Shengda, Deputy General Manager of Sanlux, conducted a deep positioning analysis of the Indonesian market from a global perspective. The speech extended from product competitiveness to brand benchmarking, delving deeper layer by layer, with data precisely refined down to specific models and competing brands. It was clearly pointed out at the meeting that Sanlux's core positioning in the Indonesian market is the "Best Alternative Choice". By striking the optimal balance of "high quality + competitive price", Sanlux delivers performance on

par with top global brands while offering far more cost-effective rates than rivals, generating tangible commercial benefits for its customers.

During the product display and interaction sessions, distributors showed a strong interest in Sanlux products. Several distributors stated that Sanlux's precise market positioning and detailed competitive product comparison data have given them a clear understanding of the brand's strength, noting that the combination of "high quality + competitive price" is exactly the product solution urgently needed in the Indonesian market.

Sanlux brings not only products but also a commitment to long-term cooperation. The company has reached a strategic cooperation intention with Asian Bearindo Group, a local Indonesian channel partner, and plans to jointly build a distribution and after-sales network to support market expansion through localized services. In the future, both parties will jointly launch a series of initiatives, including brand marketing, strategic inventory buffering, and technical team training, with a focus on developing local OEMs and end customers to truly achieve "global quality, local delivery."

The successful conclusion of this product launch conference in Indonesia marks a solid and critical step forward for Sanlux's internationalization strategy in the Southeast Asian market. As a professional manufacturer, Sanlux possesses a complete production chain, high-quality products, and a highly competitive price advantage, becoming the preferred brand for high-quality replacements in the global transmission belt field. In the future, Sanlux will continue to deeply cultivate the Indonesian and Southeast Asian markets, working hand in hand with local partners to provide reliable power transmission solutions for regional customers.

Sanlux R8 Red Label 5VX Drive Belts Successfully Supplied to a Petroleum Refining Project in Turkey

Sanlux R8 heavy-duty toothed narrow V-belts of the 5VX series have been successfully matched with a petroleum refining project in Turkey, with formal sales orders secured. The product is applied to air-cooled fans of complete refining equipment for this project. After multiple rounds of technical discussions, rigorous model selection and comparative tests in the early stage, the project side finally designated Sanlux R8 Red Label 5VX products as standard supporting parts.

The on-site working conditions of the project are extremely harsh: hydrogen sulfide gas in the air tends to decompose and damage drive belts made of natural rubber. Meanwhile, the fans feature large rotational inertia, which requires drive belts to deliver outstanding impact resistance and tensile fatigue resistance, as well as a long service life under 24-hour non-stop operation. Targeting the pain points of such working conditions, Sanlux R8-5VX series adopts EPDM rubber and aramid fiber reinforced structures to effectively resist corrosion by hydrogen sulfide gas. Its toothed surface reinforced with high-strength canvas greatly boosts impact resistance and fatigue resistance. In addition, the products are antistatic, fully complying with stringent safety standards for the refining and chemical industry.

In comparative tests, the products earned high recognition from the project contractor for their outstanding overall performance and successfully replaced the originally planned imported brand solution. This marks another milestone for Sanlux in expanding its presence in the high-end overseas refining and chemical market, representing a major breakthrough for domestically manufactured high-end drive belts in the global refining and chemical sector.

Sanlux Debuts at 40th Ceramics China in Guangzhou
Powering Smart Ceramic Manufacturing with Premium Transmission

Held from June 24 to 27 at Area A of the Canton Fair Complex in Guangzhou, the 40th Ceramics China stands as a landmark event for ceramic machinery, raw materials and intelligent manufacturing technologies. The exhibition brought together top suppliers and professional buyers across the global ceramics industrial chain, showcasing cutting-edge technologies and innovative industry breakthroughs.

As a leading domestic manufacturer of rubber V-belts with stock code 002224, Sanlux Co., Ltd. has retained its top industry position for 29 consecutive years. With over four decades of dedicated focus on transmission, the company adheres to its core business philosophy – "Quality Creates Value", and delivers high-quality, high-performance professional transmission solutions for manufacturers worldwide. At this exhibition, Sanlux displayed its flagship products

including glazing line special belts, narrow V-belts and drying cloth belts, alongside a full range of other offerings: standard belts, cross-country belts, agricultural machinery belts, industrial cutting belts and automotive belts.

Specifically, the glazing line special belt represents Sanlux's star product engineered exclusively for ceramic glazing conveying processes. Glazing lines demand belts with exceptional dimensional stability and abrasion resistance. Formulated and manufactured with proprietary materials and processes, Sanlux's glazing belts maintain precise power transmission even under high-temperature and high-humidity operating conditions. They drastically cut downtime caused by belt stretching and wear, boast a far longer service life than conventional belts, and deliver dependable support for uninterrupted production at ceramic factories.

Sanlux's booth drew steady crowds throughout the exhibition. Manufacturers of ball mills and glazing line equipment, as well as distributors, flocked to the booth for in-depth discussions covering product performance, technical specifications, working condition compatibility and cooperation models. The on-site technical team provided one-on-one professional consultations, designing customized transmission solutions tailored to unique production scenarios to fully address customers' practical demands—a tangible demonstration of the brand's philosophy of "Quality Creates Value".

The event featured enhanced international participation, with global buyers visiting Sanlux's booth. Attendees included trade partners from Asian markets such as India, Indonesia, Vietnam and Myanmar, plus numerous European customers. Smooth business negotiations were backed by full support from local distributors. Drawing on years of regional market expertise, local distributor teams remained on-site throughout the show, assisting with precise model matching, technical inquiries, product demonstrations and business talks. Their efficient, professional service accelerated the conversion of potential cooperation into tangible partnerships.

This exhibition not only highlighted Sanlux's accumulated technical expertise in ceramic transmission systems, but also underscored the brand's resolve and capacity to expand its global footprint. Moving forward, Sanlux will keep prioritizing technological innovation within the transmission sector and speed up new product development. With more reliable products and comprehensive integrated solutions, Sanlux will continue to contribute to the intelligent and eco-friendly transformation of the global ceramics industry.

Chart New Journey

JETSURF Delivers Its First Motorized Surfboard in Qingdao

On the afternoon of June 15, the delivery ceremony for the first motorized surfboard of Zhejiang JETSURF Technology Co., Ltd. was held in Qingdao, Shandong Province. Relevant officials from the China Marine Sport School, Zhang Mei, President of Wanda Sports China, and Lu Tiedong, General Manager of Zhejiang JETSURF Technology Co., Ltd., among other leaders and guests, attended the event to jointly witness a significant moment in the collaborative development of the domestic motorized surfing water sports industry chain.

At the symposium, Lu Tiedong, General Manager of Zhejiang JETSURF Technology Co., Ltd., introduced the core technical advantages, R&D system layout, and future development plans of JETSURF, the company's core brand. Subsequently, witnessed by the guests on-site, the delivery ceremony was officially launched: Zhejiang JETSURF Technology Co., Ltd. delivered the TITANIUM powered surfboard numbered 001 to the China Marine Sport School, and the RACE powered surfboard numbered 001 to Wanda Sports Group. The handover of the two debut pieces of equipment was successfully completed.

Since the 92nd UIM General Assembly held in Qingdao, China in 2019, where the motorized surfboard was officially included as a competitive event of the Union Internationale Motonautique (UIM), this water sport has entered a fast

development stage in China. Professional competitions at all levels have been normalized, and public experience popularization activities have been launched in multiple locations, with the scope of coverage continuing to expand. At the same time, China's competitive level in motorized surfing has achieved a leapfrog improvement. Chinese athletes won the World Championship title, securing the first gold medal in international competitions for this event and achieving a historic breakthrough. Behind the continuous rise of competitive strength in the industry lies the integrated support of professional equipment, tournament platforms, and educational training. This event marks a practical beginning for the three parties to leverage their respective resource endowments, complement each other's strengths, and achieve collaborative synergy.

At the brand and technical levels, JETSURF, as the sole officially designated powered surfboard equipment brand for events hosted by the UIM—such as the Motosurf WorldCup and the Motosurf events at The World Games—has firmly established itself as a

global industry benchmark. Leveraging leading R&D, rigorous quality control, a comprehensive safety assurance system, and international authoritative certifications, JETSURF is capable of continuously developing and providing high-performance professional racing and training equipment.

At the institutional level, China Marine Sport School, as an authoritative professional institution for aquatic and maritime sports in China, has long undertaken core tasks such as professional talent cultivation, national team training, and sports technology research and testing. It serves as a backbone in the construction of the professional system for motorized surfing in the country.

At the marketing and promotion level, Wanda Sports possesses mature capabilities in top-tier event operation, market-oriented promotion, and IP creation, enabling it to provide comprehensive operational support for the popularization of sports and the implementation of commercial events. This year, JETSURF has reached a cooperation agreement with Wanda Sports. Its brand JETSURF has officially

become the sole designated equipment brand for the 2026 MOTOSURF GP (MSGP) World Championship. It will provide professional racing equipment and comprehensive technical support for the event, jointly promoting the high-quality development of motorized surfing sports in China and across the globe.

This event concluded successfully, marking the official entry of the tripartite collaboration into a new phase of practical implementation. In the future, all parties will deepen long-term collaboration across four dimensions: event implementation, talent cultivation, equipment upgrades, and public popularization. Wanda Sports will focus on event IP operation and market promotion; China Marine Sport School will solidify the foundation for professional teaching, intensive training, and talent selection; and JETSURF will continue to provide high-quality competition and training equipment along with a full suite of technical support. The three parties have leveraged their respective strengths and collaborated closely to establish a complete industrial closed-loop integrating equipment, teaching, and competitions. Moving steadily forward according to the established cooperation blueprint, the three parties will work together to inject continuous momentum into the long-term development of domestic motorized surfing.

2026 Jiwei Brand Forum & New Model Zhejiang Launch Event Concludes Successfully

If one sentence could sum up this annual grand gathering, it would be: packed with actionable insights, great wine to savour, and new inspiration kindling in every heart—truly a rewarding experience for all attendees!

This is not just a launch event about "Transformation and Symbiosis," but more of a high-quality "recharging session" for adults.

Let's take a closer look at the key highlights delivered at this landmark event.

Act I // Multi-brand Matrix, Mastering Industrial Romance
SHEFFIELD, Great Wall Precision, WD-40, Sanlux, Jinzuan, and FAYGOPLAST converge at the same venue. This is not a simple permutation and combination, but a top-tier "strength and precision" muscle show of China's hardware industry.

Act II // Say No to Nonsense, a Major Cognitive Upgrade Session
The afternoon forum featured vibrant, impassioned discussions with no scripted speeches. Attendees dug deep into core industry pain points through layered, in-depth dialogue.

Rather than nodding from the audience, it is better to take the microphone and ask a question. The forum

functioned as a high-level networking summit for resource matching and knowledge advancement. Valuable industry insights were laid out openly, and it fell on each attendee to absorb ideas and take decisive action.

Act III // Topsy Turvy, Drinking to Deepen Bonds
As night fell, business leaders shifted gears into a laid-back celebration. Free from PPT and KPIs, guests shared candid conversations over drinks. A perfectly balanced glass of wine or a nostalgic classic song brought everyone a rare sense of ease. "Business partnerships are forged through discussion, while sincere friendships are built over shared drinks." Tonight, we set aside work stress to enjoy the moment; tomorrow, we will return as united partners.

The 2026 Jiwei Brand Forum has drawn to a close, yet our journey of transformation has only just begun.

This annual grand event possesses both depth and warmth; it doesn't lecture you on how to do business, but simply aims to "get things done" together with you. Thank you to everyone who handed out a business card, thank you to everyone who asked a great question, and a special thank you to those who weren't there in person but followed us through our Moments.

"Integration for Transformation, Synergy for Coexistence"—these words are no longer just slogans hanging on the wall, but the daily practice we are set to implement moving forward.

Our industry journey continues. We look forward to reconnecting at our next premium summit!

Daily Clearance to Drive Execution, Source Control Secures Stable Supply

In June, the Supply Chain Department closely focused on the core objective of "Ensuring Shipments." Driven by institutional innovation, supported by standard construction, and guaranteed by team synergy, the department comprehensively promoted the implementation and effectiveness of various key tasks. By establishing a responsibility allocation mechanism, implementing "daily clearance" management, strengthening the construction of post standards, and strictly controlling supplier quality, a favorable situation of steady growth in shipment volume and a continuous decline in logistics costs has been achieved, providing a solid supply chain guarantee for the high-quality development of the company.

1 Mechanism Innovation: Establishing a Responsibility Allocation Mechanism for Ensuring Shipment to Strengthen the Delivery Assurance System

The Planning Department took the lead in establishing and improving the responsibility allocation mechanism for ensuring shipments, decomposing shipment targets level by level and assigning responsibilities to individuals, forming a responsibility system where "everyone has indicators and everything is managed." By defining the specific responsibilities of each position in various stages—including order acceptance, production planning and scheduling, material tracking, production coordination, and logistics delivery—the entire responsibility chain from order to delivery has been integrated, ensuring that every order and every product can be dispatched on time and with guaranteed quality.

The establishment of the accountability mechanism has effectively resolved previous issues of unclear responsibilities and passing the buck, achieving traceability and controllability throughout the entire shipping process. All departments and positions took proactive responsibility and cooperated closely, forming a collaborative combat pattern oriented toward delivery targets, which laid a solid institutional foundation for the increase in delivery volume in June.

2 Management Upgrade: Implementing the "Daily Clearance" Meeting System to Ensure That Today's Work Is Completed Today

The Supply Chain Department has fully implemented the "Daily Clearance" management model, organizing daily special meetings to ensure that "Ensuring Shipments" is the top priority. The meeting was presided over by the department head and attended by the heads of each section. It involved a step-by-step review of the day's work completion, identification of existing problems and bottlenecks, and clarification of the next day's key priorities and improvement measures.

Through the daily review mechanism, early detection and resolution of issues have been achieved, preventing the accumulation of problems and delays. For tasks not completed on the same day, analyze the reasons item by item, assign responsibilities, and specify deadlines to ensure that "today's work is completed today." The establishment of the meeting mechanism has not only improved work efficiency but also strengthened the team's execution and sense of urgency, fostering a positive work atmosphere of "completing each day's tasks within the day and making daily improvements."

3 Standard Implementation: Updating Job Performance Standards and Consolidating the Foundation of Standardized Management

In June, the Supply Chain Department initiated the update of job standards, comprehensively reviewing the job responsibilities, workflows, work standards, and assessment requirements for each position, resulting in a systematic and standardized job standard system. From planners and buyers to logistics specialists, warehouse managers, and department heads, every position has clearly defined "what to do, how to do it, and to what standard," providing clear guidance for employees to carry out their work.

The update of job standards not only standardizes work behavior but also improves work quality. Through the dissemination and training of standards, employees' awareness of standardization has been significantly strengthened, and the regularity and consistency of work have been effectively improved, providing standard support for the enhancement of overall supply chain operational efficiency.

4 Source Control: Conducting On-site Supplier Audits to Ensure Raw Material Quality and Lead Times

The Purchasing Department organized and conducted on-site supplier audits, going deep into the production front lines to perform comprehensive evaluations across multiple dimensions, including quality management systems, production processes, capacity assurance, and delivery capabilities. It gained a comprehensive understanding of the supplier's true operational status through on-site inspections of the production environment, verification of quality records, and communication with the management team.

The implementation of on-site audits has effectively controlled the quality of raw materials at the source and screened out a group of high-quality suppliers with reliable quality and stable delivery. For issues identified during audits, timely feedback was provided to suppliers along with supervision of their rectification efforts. This promoted continuous improvement in suppliers' quality management levels and delivery assurance capabilities, providing a stable supply of raw materials to ensure the smooth progress of production.

Moving forward, the Supply Chain Department will continue to uphold the work philosophy of "daily clearance with efficient collaboration." We will constantly strengthen the management foundation, optimize business processes, and continuously enhance supply chain resilience and competitiveness to safeguard the successful achievement of the company's annual operating goals.

On the vast stage of commerce, distributors and brand owners dance as partners, together performing a harmonious symphony of mutual success. By leveraging their respective strengths and supporting one another, distributors and Sanlux not only fulfill their individual dreams but also collectively contribute to the market's brilliance.

Two Decades of Belt Collaboration, Industrial Development Along Wanjiang
My Twenty-Year Bond with Sanlux

Having been rooted in southwestern Anhui for two decades, the company first established a connection with Sanlux in early 2006, always remaining true to the original aspiration of exclusively selling authentic Sanlux products. Starting from a small shop in the old city of Anqing, the market coverage extends to modern agricultural bases in Chizhou and major mining areas in Tongling, with synchronized operations in the Hefei region through brand authorization. With ample stock in both Anqing and Hefei warehouses, we offer a complete range of specifications for all series of V-belts and special transmission belts. We serve customers in mining, agricultural machinery, breeding, and manufacturing with stable quality, standardized channels, and sufficient ready stock. Through two decades of dedicated cultivation, we have earned the long-term trust of numerous customers, writing a brand story of symbiosis and win-win cooperation between the Jianghuai region and Sanlux.

Origin One Choice, a Lifetime of Commitment

In the early spring of 2006, I came from Pingxiang, Jiangxi to Anqing to make my way. The ups and downs of my past business made me deeply aware of the challenges in the real economy, so I was determined to find a transmission belt brand with reliable quality and standardized channels to establish myself. In my early years, I dealt with various off-brand V-belts that were prone to breaking and wore out quickly, often delaying customers' production; I have been searching for a reliable product worthy of trust ever since.

One early morning, I saw the Sanlux store sign in the

streets and alleys of the old city of Anqing. Upon my first contact with the products, I felt a sense of approval: the materials used were solid, the models were standard, the manufacturer's pricing was transparent, and the channel management was well-regulated. I made up my mind to specialize in authentic Sanlux products and founded Anqing Tiandong Rubber & Plastic to deliver durable and reliable transmission accessories to agriculture in Chizhou, mines in Tongling, and industrial and mining enterprises in Anqing.

selection and operating condition guidance services.

Through steady and diligent operations, Sanlux's reputation has gradually grown, achieving full coverage across all towns and townships in Anqing. It has accumulated a large number of long-term customers in Chizhou's agricultural bases and Tongling's mines, with its market share rising steadily. Relying on years of stable operations, Sanlux headquarters has authorized me to be responsible for distribution in the Hefei region. Today, the two major warehouses in Anqing and Hefei maintain a standing stock of all product categories. Specialized belts for agricultural machinery and mining are stored separately, enabling rapid shipment for both large and small orders, while the scale of operations continues to grow steadily. Peers often ask me why I have focused solely on Sanlux for 20 years, and my answer remains unchanged: the brand delivers consistent product quality and standardized management, and long-term collaboration is the foundation of steady growth.

Cultivation Quality as the Boat, Integrity to Expand the Market

Conditions were tough in the early stages of the business; at first, I couldn't even remember the complete list of belt models. During the day, I manage the store and receive customers; at night, I study the Sanlux product manuals, noting down specifications, suitable working conditions, and performance metrics line by line, all to ensure precise product matching for my customers.

Understanding the product is only the foundation; acquiring customers can only be done through on-site visits. I drove my old car, fully loaded with samples, across all townships and development zones in Anqing, visiting machinery plants in the urban area, plastics factories in Tongcheng, cement plants in Huaining, and mining equipment factories in Qianshan one by one. For the planting and breeding industries in Chizhou, we primarily promote specialized V-belts for agricultural machinery and fans; for the mines in Tongling, we promote high-wear-resistant heavy-duty industrial belts, while simultaneously providing on-site model

Witness Brand Power, Win-win Growth Together

Over the past two decades, I have personally witnessed the industrial changes in southwestern Anhui: the large-scale development of agriculture in Chizhou, the continuous updating of mining equipment in Tongling, and the constant innovation and upgrading of Sanlux. From basic agricultural

machinery V-belts to high-temperature-resistant and tear-resistant special mining belts and synchronous belts, new products continue to iterate to adapt to complex working conditions such as continuous agricultural operations and high-intensity mining operations.

Outlook Staying True to Original Aspiration, Embarking on a New Journey Together

Having accompanied Sanlux for 20 years, I am now nearly 60 years old with graying hair at my temples, yet my original aspiration to deeply cultivate the transmission industry has never changed. The company has assembled a young team of sales, warehousing, and service personnel. I often tell everyone that Chizhou's agriculture and Tongling's mines cannot function without durable transmission components. Choosing the right reliable brand requires steady and long-term operation, and Sanlux is worthy of our dedicated cultivation.

Currently, Sanlux has entered a stage of high-quality development, promoting digital transformation and continuously launching new transmission products adapted to

modern agriculture and large-scale mining heavy industries. We keep pace with the headquarters by upgrading two warehousing facilities and increasing reserves of specialized belts for agriculture and mining. By optimizing distribution and after-sales standards, our sufficient stock ensures that customers in Chizhou, Tongling, and Hefei can pick up goods at any time, extending Sanlux's excellent reputation to more county-level industrial parks.

This bond, which began in 2006, centers on a single V-belt that has carried my twenty-year journey of struggle; on the land of Jianghuai, the story between Sanlux and me will continue to be written steadily.

Old Item Renewal, Dragon Boat Festival Celebration Sanlux Holds Successful "New Life for Old Items" Flea Market

On June 13, Sanlux Co., Ltd. was bustling with excitement as a unique Dragon Boat Festival flea market themed "New Life for Old Items" kicked off with great enthusiasm! The air filled with sweet mugwort fragrance marked the heartfelt spirit of the Dragon Boat Festival. Idle old items met new owners, antique-style silver notes circulated through the crowd, and lucky grand prizes were awarded to various winners. Amidst laughter and joy, all employees enjoyed an immersive experience in this Dragon Boat Festival carnival where tradition and fun intertwined.

Direct from the scene, let's look back at the wonderful moments of this market together.

Early Bird Redemption: Silver Notes Granted Full Access to the Market

At 9 a.m., as the flea market had just kicked off, the booth of the note booth was already crowded with people. Employees who submitted their old items early on June 6, holding their receipts, joyfully redeemed their exclusive "Silver Notes." Clutching the heavy silver notes in their hands, everyone was eager to give it a try, and the lively atmosphere of the market was instantly ignited.

Check in for Benefits: Dragon Boat Festival Gift Packs Warmed the Heart

Starting from 10 a.m., employees arrived at the factory reading room one after another to sign in and enter. With the gift voucher, they not only received a Dragon Boat Festival gift pack full of sincerity but also obtained three taels of silver notes as "starting capital" for exploring the market. With this seed money, everyone rushed to the flea market in the cafeteria area, eager to start their treasure-hunting journey.

Treasure Hunting for Old Items: Fun at the Flea Market

Walking into the cafeteria and the main corridor, one is greeted by a series of characteristic stalls laid with picnic mats and adorned with creative foam board displays, creating a vibrant and bustling

marketplace atmosphere.

Bargaining, endless fun: Stall owners set prices independently based on the condition of the items, while buyers weave through to pick out their favorite treasures. 1 tael, 2 taels, 3 taels... Everyone traded happily with silver notes, experiencing the purest joy of buying and selling through negotiation and bargaining.

Third-party support, extra benefits: On-site, in addition to the official flea market stalls, third-party cooperative stalls such as China Telecom, China Mobile, and Hengyuanxiang were also making a simultaneous appearance. Allowing employees to consult on and handle daily life services while browsing the market, achieving a one-stop experience of "returning with a full load."

Lucky Wheel: Grand Prizes Ignited the Crowd

How can you go on a food and shopping spree without the thrill of a lucky draw? Long lines had already formed in front of the Lucky Wheel!

With a gift voucher featuring a lucky number in hand, employees can spin the Lucky Wheel once by spending just 3 taels of silver notes. As the turntable spun rapidly, gasps of wonder and bursts of laughter rose one after another: valuable Dragon Boat Festival

specialty gifts, practical household items, snack gift packs to satisfy cravings, and Dragon Boat sachets symbolizing health and safety were all claimed by the lucky winners. Whether the prizes were big or small, everyone's face was beaming with festive joy.

New life for old items. During this Dragon Boat Festival Flea Market, idle items were recycled and given new life. Employees strengthened their friendships through interactive exchanges and experienced the beauty and vitality of the Sanlux family during this traditional holiday.

Wishing you a safe and healthy Dragon Boat Festival, and we shall meet again next year!

Mission Adherence to Alternative Planting, Overseas Anti-drug Barrier Consolidation

Xishuangbanna Lubo Xiangjiao Shines at 10th China-South Asia Expo with Remarkable Outcomes

From June 11 to 16, 2026, the 10th China-South Asia Expo was grandly held at the Kunming Dianchi International Convention and Exhibition Center. The exhibition features a dedicated comprehensive pavilion for alternative development effectiveness, focusing on displaying the development achievements and characteristic products of high-quality alternative planting enterprises across the province. The company appointed Deputy General Manager Jiang Xiaoping to lead a delegation to the conference and carry out three key activities centered on the main themes of alternative development and drug control for public prosperity.

1 to showcase core products and industrial achievements.

The company exhibited its main products, such as natural rubber and "Sanlux" V-belts, providing a visual presentation of the development achievements of the overseas alternative planting industry.

2 to participate in alternative development economic and trade cooperation activities.

The company profile and overseas substitution planting projects were promoted to the attending guests on-site. Cooperation intentions were reached, and cooperation agreements were signed with partners, with a total contract value of RMB50 million. This move effectively broadens the sales channels for substitute products and consolidates the industrial foundation of "promoting drug control through development."

3 to participate in the "6·26" International Day Against Drug Abuse and Illicit.

Trafficking theme publicity activities. A promotional banner reading "Never forget the original intention of drug control; keep the mission of drug control firmly in mind" was hung at the site, demonstrating to merchants from all walks of life the enterprise's firm stance on deeply cultivating alternative planting and adhering to the drug control defense line.

The company has long been deeply involved in the front line of cultivation along the China-Laos border, always adhering to its original aspiration for drug control and keeping its mission of source eradication in mind. By relying on physical industries to substitute poppy cultivation, it continues to consolidate the effectiveness of drug control governance. Moving forward, the company will continue to leverage opening-up platforms such as the China-South Asia Expo to optimize the layout of the cross-border rubber industry and enhance product market competitiveness. It will consistently deepen cross-border anti-drug cooperation, fully serve the overall national anti-drug efforts, contribute to the high-quality joint construction of the "Belt and Road Initiative," safeguard border harmony and stability, and promote good-neighborly friendship between China and Laos.

Study and Practice Sound Performance Philosophy, Celebrate CPC's 105th Anniversary with Pragmatism and Responsibility

The Party Branch of Sanlux Co., Ltd. Traveled to Shanghai to Carry out a Thematic Party Day Research and Learning Activity

To deeply study and practice the correct outlook on performance, celebrate the 105th anniversary of the founding of the Communist Party of China, and further consolidate the majestic strength of all Party members in entrepreneurship, pragmatism and responsibility, on June 25, the Party Branch of Sanlux Co., Ltd. organized key Party members to go to Shanghai for a themed Party Day research and learning activity. At the Site of the First National Congress of the CPC, everyone traced their red roots; at the Sihang Warehouse, they revisited the history of the War of Resistance; and through spiritual dialogues spanning time and space, they tempered their Party spirit and honed their original aspirations.

Tracing the First National Congress

Drawing the Original Aspiration and Strength of "Political Performance for the People" from a Century of Elegance

On the morning of June 25, the Party Branch of Sanlux first visited the Site of the First National Congress of the Communist Party of China and its memorial museum located on South Huangpi Road, Shanghai. The Shikumen buildings, with their gray

bricks and black tiles, stand solemn and majestic in the heart of the bustling metropolis. This is the "birthplace" of the Communist Party of China and the spiritual home of Chinese Communists.

Upon entering the memorial hall, the Party members followed the guide's lead and successively visited exhibition areas including "Going One After Another to Save the Nation from Subjugation," "Awakening of the People and the Choice of Ideology," "Early Organizations and the Initial Spark," "An Epoch-Making Event and the Sun Rising in the East," and "Forging Ahead and the Glorious Journey." Precious historical photos, mottled revolutionary relics, and vivid video materials provide a panoramic recreation of the Great Journey of the Communist Party of China as it grew from nothing to something, from small to large, and from weak to strong.

In the Oath-taking Hall of the Site of the First National Congress of the CPC, facing the bright red Party flag, the branch members solemnly raised their right fists and revisited the Party admission oath. The powerful and resonant oaths echoed through the hall, also challenging the hearts of every Party member.

Salute to Sihang

Reflecting on the Heroic Spirit of "Pragmatism and Responsibility" in Front of the Bullet-Hole Wall

In the afternoon, the study tour team drove to the Sihang Warehouse Battle Memorial Museum on the north bank of the Suzhou Creek. This reinforced concrete building stands in silence, the dense and shocking bullet holes on its western gable seemingly still telling the wordless story of the tragic and heroic defense by the "Eight Hundred Heroes" in 1937.

Entering the memorial hall, everyone visited the four exhibition areas in sequence: "Bloody Battle of Songhu," "Defending Sihang Warehouse," "Resistance of the Isolated Army," and "Immortal Monument." Through physical exhibits, reconstructed combat scenes, and multimedia audiovisual displays, the Party members deeply felt the unwavering loyalty and patriotic spirit of Commander Xie Jinyuan and the "Eight Hundred Heroes," who risked their lives to fight alone in the face of national peril. The final letters written before death and the relics from battles deeply moved every Party member present.

Unity of Knowledge and Action

Welcoming the 105th Anniversary of the Founding of the CPC with Practical Achievements

History is the best textbook as well as the best sobering agent. This study tour in Shanghai is both a journey to trace our "red roots" and a transformative experience to temper and strengthen Party spirit.

In the upcoming work, guided by deeply studying and practicing the correct outlook on performance, Party members will engrave the words "Pragmatism and Responsibility" into their bones and implement these words through actions. At the end of the activity, Party members expressed that they would transform the reflections and insights gained from this study tour into practical actions. Party members should not indulge in idle dreams or pursue empty fame. Instead, they should devote themselves to their posts with greater enthusiasm and a more pragmatic style. Meanwhile, they will earnestly remain loyal to the Party, benefit the people, and take on responsibilities to welcome the 105th anniversary of the founding of the Communist Party of China with outstanding work performance and practical results of high-quality development!
